

Galvanised Square Post for Barrier Edge Mesh Panel

SKU: EPBMPP

Galvanized posts designed for the Mesh Panel Barrier Edge Protection System, standing at a height of 1005mm and featuring a 152mm square mounting flange.

The specialized posts are designed to securely fasten the Barrier Edge Protection System - Mesh Panel, offering convenience and ease of installation. Crafted from durable galvanized 50mm square RHS, these posts stand at a height of 1005mm and feature top and bottom wire panel holding lugs equipped with slide and lock assemblies, facilitating swift panel installation and removal. Suitable for concrete or paved areas, these posts boast a low-profile square fixing flange, easily affixed with masonry bolts, although it's advisable to consult with engineers regarding concrete specifications.

Key Features:

- Specifically engineered for concrete or paved surfaces
- 152mm square x 5mm fixing flange
- Secure fastening with 4 x 13mm diameter holes, compatible with four 10 x 75mm masonry bolts or similar
- Constructed from robust galvanized 50mm square RHS
- Tested and approved to AS 4994.1:2009 standards
- Reliable locking lugs ensure panels remain firmly in place
