

Galvanised Tie Wire Roll - 1.57mm x 180m

SKU: TWGR180

Galvanized tie wire measuring 1.57mm in diameter and 180 meters in length

Enhance the durability and longevity of your construction projects with our galvanized tie wire. Renowned for its corrosion resistance, this tie wire is indispensable for general tying and fixing tasks on civil work sites, construction projects, and beyond. Its galvanized coating ensures protection against rust and corrosion, making it ideal for outdoor applications. Each roll boasts a diameter of 1.57mm and a generous length of 180 meters, providing ample supply for various tying needs. With a weight of approximately 2.55kg per roll, it offers both convenience and reliability for your construction needs.

Key Features:

- Galvanized coating for corrosion resistance
- Suitable for general tying and fixing tasks
- Ideal for civil work sites, construction projects, and more
- Diameter: 1.57mm
- Roll length: 180 meters
- Weight: approximately 2.55kg per roll
