

High Visibility Orange Geotextile - 6m x 150m

SKU: WGO6A

High visibility orange geotextile, tailored for distinguishing between contaminated and uncontaminated soils, notably in asbestos remediation applications.

HEIGER Hi-Vis Geotextile is a premium staple fiber geotextile crafted to differentiate between contaminated and uncontaminated soils. Its vibrant high visibility orange hue makes it ideal for serving as a warning layer in regions prone to future excavations. HEIGER Hi-Vis Geotextile offers comparable performance to other geotextiles within the HEIGER range.

Applications:

- Separation of contaminated soil
- Filtration
- Warning Layer

Specification

roll-width: 6m
