

Jute Matting (Pre-slit) - 1.83m x 25m | 750GSM

SKU: JMPB0250750

A jute mat, also known as a jute erosion control mat or jute blanket, is a natural and biodegradable erosion control product used to prevent soil erosion in various landscaping, construction, and environmental restoration applications. Jute is a natural fiber obtained from the jute plant, making it an eco-friendly choice for erosion control. The pre-slit variety comes with 6 slits per square metre, allowing for quick and easy installation of plants to suit your landscaping requirements.

Embrace a well-established practice for soil and erosion control with HEIGER Australia's eco-conscious jute products. Unlike harmful plastic alternatives, our 100% biodegradable products are trusted by gardeners, landscapers, civil contractors, and government departments across the nation. We've been providing top-quality, eco-friendly services since our inception in Melbourne, consistently exceeding customer expectations. Order from us today and experience the difference!
