

Jute Mesh Soil Saver - 1.22m x 550m | 500GSM

SKU: JMSA5500500

HEIGER Jute Mesh (Hessian Fabric) is your eco-friendly solution for reliable erosion control. It's 100% natural and biodegradable and promotes healthy vegetation growth.

The use of this fabric to combat soil erosion is a well-established practice. It serves as a natural filter and buffer against harsh climatic conditions. Unlike plastic meshes that harm the environment, eco-conscious gardeners and landscapers are turning to traditional biodegradable fabrics for their landscaping needs. HEIGER Australia is your trusted supplier of 100% biodegradable jute erosion control products, serving customers nationwide. Since our establishment in Melbourne we've been providing high-quality, eco-friendly services to a diverse clientele, including civil contractors, government departments, and private landowners. We consistently go above and beyond to meet our customers' needs. Order from us today and experience the difference!
