

Water Filled Pedestrian Barrier - Blue 2m

SKU: WFBB2

Introducing the HEIGER water-filled barrier, measuring 2150mm in length, 900mm in height, and 500mm in width. Crafted in Australia using 25% recycled materials and backed by a 5-year warranty covering both materials and labor. This versatile barrier serves as an optimal safety solution for pedestrian delineation, cordoning off restricted areas, managing drop-offs and pits, and enhancing traffic control. Additionally, it's offered in red.

The HEIGER Waterfilled Barrier represents a breakthrough in Australian-designed and manufactured barriers, engineered to withstand the harshest conditions. Offered in vibrant red and white for enhanced visibility, its robust UV-protected polyethylene construction ensures prolonged durability under the intense Australian sun. Installation is hassle-free thanks to its lightweight design; each module weighs just 20kg when empty. Once filled with water, each barrier achieves a weight of 327kg, providing exceptional stability and security, meeting stringent Australian Standards. Designed with worker safety in mind, its rounded corners facilitate safe handling, while an integrated interlocking pin and hole system ensures a seamless, one-piece unit with no loose components. Convenient built-in handles aid in both interlocking and transportation when empty. Constructed from eco-friendly recyclable polyethylene, the HEIGER water-filled barrier comes in 2-meter long modules, making it ideal for various applications including pedestrian delineation, cordoning off restricted areas, drop-offs, and pits at worksites. Furthermore, its adaptability allows for the attachment of lights and signage, transforming it into a 24-hour traffic control solution.

Key Features:

- Centrally located 70mm filler, overflow, and 50mm drain
- Material strength tested to AS/NZS 4766:2006
- UV20 Protection to ASTM D2565
- Recommended for carparks, worksites, and pedestrian delineation
- Integrated light bracket on top of the barrier
- Recyclable and eco-friendly
- Sturdy and user-friendly design
- No loose pins
- Dimensions: 2150mm(L) x 900mm(H) x 500mm(W)
- Weight: 20kg empty, 327kg full
- Contains 25% recycled material

As Australia's leading supplier of water-filled barriers, HEIGER has been a trusted name in the construction industry for over two decades. Our knowledgeable staff, with extensive industry experience, are dedicated to helping you find the right solution for your needs.

Specification

standards:	Material strength tested to AS/NZS 4766:2006
certifications:	UV20 Protection to ASTM D2565
colour:	Blue
weight:	Empty - 20kg Full - 327kg
material:	Polythene
