

Weighted Drain Grate Cover 0.5m x 0.5m

SKU: WDGCB

Weighted Drain Covers offer a straightforward and efficient solution to temporarily seal drain pits during spills, preventing stormwater contamination. These covers, featuring a thick PVC cover with a geotextile underlay, provide a robust seal on various surfaces. Gel-filled PVC edges ensure conformity to most flooring surfaces, making them a cost-effective component of stormwater management plans.

Weighted Drain Covers provide a simple yet effective solution for swiftly sealing drain pits during spill incidents, thereby averting potential stormwater contamination. This cost-effective measure serves as an integral component within stormwater management strategies, safeguarding against environmental hazards.

Features:

- Gel-filled edges ensure a secure seal on a variety of surfaces.
- Equipped with four stitched carry handles for effortless and safe relocation.
- Includes a storage bag for convenient storage when not in use.

These covers are constructed with a robust PVC cover and a geotextile underlay, guaranteeing a durable seal on most surfaces. Moreover, the gel-filled PVC edges offer adaptability, enabling the cover to conform to different flooring types. With Weighted Drain Covers, environmental protection becomes a seamless and efficient process, ensuring the integrity of stormwater systems.

Specification

density: PVC Cover - 900GSM | Non-woven geotextile underlay - 260GSM
