

White Hoarding Panel - 2m x 0.5m

SKU: WHP2A

Hoarding Panels offer a versatile, eco-friendly, and easy-to-install solution for construction site enclosures, featuring lightweight, recyclable plastic panels with rapid installation and customization options.

Introducing the Hoarding Panels, a recyclable plastic panel system designed for environmental sustainability and ease of use. These lightweight modular panels facilitate quick and effortless installation, perfect for phased projects or dynamic worksites. With rapid installation and removal capabilities, they offer flexibility for changing environments. Without the need for nails or screws, the panels remain undamaged, ensuring reusability time and again. Featuring a clean, smooth exterior, the Hoarding Panels maintain a professional appearance, allowing for customization with graphics or vinyl attachments. Their slim 500mm width enables easy contouring around corners and irregular shapes, making them highly versatile and user-friendly compared to traditional hoarding panels. Additionally, these panels are robust, UV-resistant, and compliant with Australian Standards.

Key Features:

- Lightweight and easy to handle
- Fast installation process
- UV resistant and recyclable
- Suitable for printed panels or custom vinyl wraps
- Available in two configurations: Hoarding Panels Portable and Hoarding Panels Fixed In-Ground
- Hoarding Panels Portable: Designed for high pedestrian areas or sites requiring frequent repositioning, featuring 3m high and 0.5m wide panels that can adapt to various site landscapes.
- Hoarding Panels Fixed In-Ground: Offers a clean and fast alternative to traditional timber hoarding, with a rapid installation rate of up to 100m per day for semi-permanent structures.
- All panels are 100% reusable, compatible with both portable and permanent systems, ensuring maximum versatility and sustainability.
